J-8, Joint Requirements Office (JRO), CBRN Defense, Doctrine and Training Branch

briefing to the

World Joint Training Conference, 16-18 September 2003

JRO Brief to WJTC

Agenda:

- J-8, JRO, CBRN Defense

- CBRN Defense Doctrine and Training Gaps

- Doctrine and Training Initiatives

- JRO Doctrine and Training Branch Vision

- JRO Support to JNTC

JRO Brief to WJTC

JRO, CBRN Defense:

- **Formally established 1 October 2002**

- **Chairman controlled; reports to CJCS through the DJ-8**

- **CJCS focal point for all CBRN defense issues**

JRO Brief to WJTC

JRO, CBRN Defense (Cont.):

- **Coordinates/integrates DoD CBRN defense program materiel requirements**

- **Develops Joint Operational Concept, ModPlan and POM Strategy for CBRN Defense**

- **Facilitates the development of CBRN defense, multi-service and joint doctrine and training**

CBRN Education, Training and Doctrine Gaps

GULF WAR 1991	Identified shortcomings affecting the ability to fight and survive in a chemically and/or biologically contaminated environment.
GAO AUDIT 1996	Units continued to face many of the problems experienced during gulf war. Equipment, training, and medical shortcomings persist. CB Defense continues to receive low emphasis.
CINC ASSESSMENT 1998	Lack of formal WMD training received by all officers and enlisted personnel. Coverage of WMD topics at the intermediate service schools is virtually non-existent. Senior service schools coverage somewhat better.
TAT 322 1999	Lack of qualified personnel in to work on exercises. Doctrine needs emphasis on NBC/WMD considerations. Mid level Joint & Service college curriculums missing WMD threat or U.S. response capability. Senior Joint & Service colleges have some curriculum related to the NBC/WMD threat.

CBRN Education, Training and Doctrine Initiatives

TAT 477 2000-2002	Provided assistance to enhance curriculum, provided SME speakers, supported wargames, and built electives.
TAT 199 2002-2004	Expanded the initiative to improve the awareness of CBRN Defense, by reviewing/revising course, electives, and providing speakers/senior leader seminars to the PME system and the combatant commands.
TAT 314 2004-2007	Another expansion to improve the awareness of CBRN Defense, by effecting systemic solutions, to the JTS, the PME system and by providing direct support to the combatant commands.

JRO Education, Training and Doctrine Vision

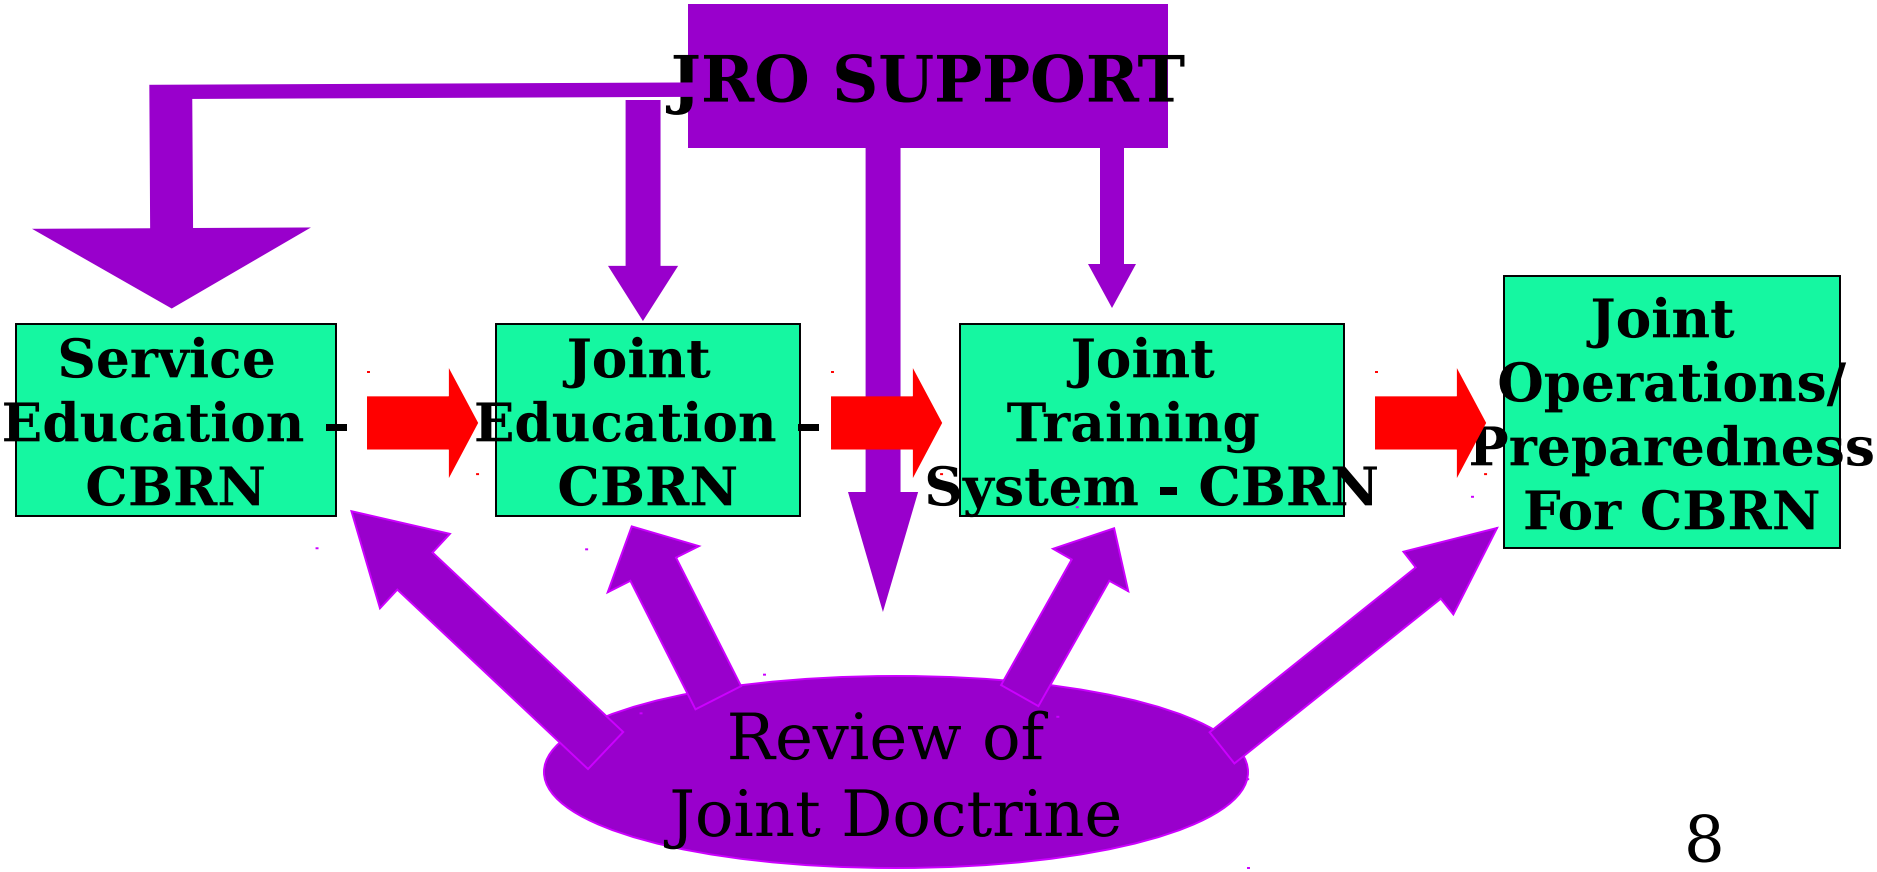
Objective: Combatant command staffs capable of performing joint staff actions in preparation for joint operations in a CBRN environment. This staff capability is reflected in training/exercises, planning and operations, in peace and war.

End-State: The initiative will have reached its conclusion, when:

Current and replacement combatant command staff members meet the objective and a command environment promotes CBRN readiness.

Military colleges educate personnel to meet the objective, are themselves staffed with personnel who are CBRN aware/educated and are sustained with

JRO Education, Training and Doctrine Initiative - Strategy



JRO SUPPORT
Service Education - CBRN
Joint Education - CBRN
Joint Training System - CBRN
Joint Operations/ Preparedness For CBRN
Review of Joint Doctrine

Joint Education, Training, and Doctrine Initiative - What We Offer to Combatant Commands

- Provide direct CBRN technical assistance to combatant commands and/or the USCG in the development, planning, execution and/or assessment of exercises
- Conduct tailored CBRN-related seminars for combatant commands, especially important as pre-exercise preparation
- Provide combatant commands with Threat (Red) Cell-related assistance to effectively integration CBRN considerations into exercises
- Conduct the eight-hour, Joint Nuclear Biological Chemical Familiarization Course (JNBCFC), at the combatant and/or their component commands. This is especially important as pre-exercise preparation

Joint Education, Training, and Doctrine Initiative - What We Offer to Combatant Commands

- Conduct the CBRN Seminar for Senior Leaders at combatant and/or their component commands. This is especially important as pre-exercise preparation

- Analyze and identify key CBRN Defense tactics, techniques and procedures (TTP) required for a Combatant Commander or Joint Task Force (JTF) Commander to develop and implement training for JTF, CBRN staff functions and to integrate it into the Joint Exercise Life Cycle (JELC). The JRO will also create and provide a handbook that identifies these TTP to the combatant commands/JTF.

- Identify actions to integrate CBRN Defense considerations throughout the 4 phases of the JTS, and provide information/training to the combatant commands, as appropriate.

Staff Familiarization Training - Details

- **Designed to familiarize Joint Staff Officers with the threat of WMD, joint force CBRN defense, and joint staff officer CBRN roles/responsibilities.**

- **Uses a combination of lecture and seminar where the students are actively involved in providing examples and personal experiences and discussing a series of illustrative vignettes, allowing students to experience how to prepare for joint operations in a CBRN environment.**

- **Presents definitions, terminology, and information about WMD and joint operations in a CBRN environment.**

- **Is eight hour, MTT course, taught in one segment or incrementally, over 1 to 2 days (mod to meet command needs).**

Staff Familiarization Training – Details Continued

•**Topics taught, include:**

- CBRN Fundamentals - Proliferation
- Deterrence - Counterproliferation
- Consequence Management - Joint Support in CBRN
- CBRN Planning Considerations -CBRN & Joint Training

• Consists of pre-course readings (1 to 2 hours), followed by the presentation and seminars. There is a "leave-behind" package which includes a staff assistance tool and instructional materials.

• For up to 48 students

The Costs

- **Time: to conduct the staff training/seminars, and we will work with you in view of OPTEMPO**
- **Space to teach the course & for SMEs @ exercises**
- **Cost to commands: $0.00**
